

# **Basic Internship@Clevered AI App/ Project Name**

## **App User Manual**

**Author: Yasmin Anane**

# Acknowledgements

I would like to thank my parents for encouraging me to enter this course and to my amazing teacher, Mrs. Mani, who is very patient with me and is always open to help.

# About Me..

- My name is Yasmin Anane
- I am a 13 year old
- I am Tunisian
- I was born in Abu Dhabi
- I live and study in Qatar.

# About My Internship with Clevered..

- I have learnt how to import different types of blocks for varied actions
- I have learnt how to assemble those blocks to create a program
- I have learnt how to manage my time between completing my app program and my school assignments

# About App..

- The app welcomes the user with a home screen
- A sprite asks for the first and second numbers
- It then asks for the operator or type of calculation
- It then speaks the result and shows it on the screen

I will be programing an interactive calculator using speech synthesis and speech recognition. My program will have to be able to process speech commands of various arithmetic operations ( add, subtract, divide, multiply ) It will also provide the speech outputs of results.

**How do I use the App?**
